

SALISBURY LASER CLINIC

The Salisbury Laser Clinic is the longest-running skin laser clinic in the UK. Forming part of Salisbury Hospital's skin service, we have always provided care for NHS patients. In recent years, we have been able to provide the same high level of care and expertise to self-paying, or private, patients.

Your support allows us to invest in state-of-the-art lasers and safety equipment. NHS Consultants, Doctors, Nurses and Clinical Scientists provide your care. Furthermore, you can relax in the knowledge that our service has an unmatched safety and quality record.

This leaflet aims to outline the services that are provided on a self-pay basis. 100% of our proceeds go back into the NHS and initial consultations are **FREE**.

***Please note:** If you have a suntan or an artificial tan, it may be necessary to delay or re-arrange your appointment.*

Among the private services available are laser treatments for all of the following:

RED SKIN BLEMISHES

We have a choice of vascular lasers designed to treat blood vessels and red skin marks. Our trained laser nurses and clinical scientists carry out this service. Our most popular treatments include:

ACTIVE ACNE, RED BIRTH MARKS, REDNESS, ROSACEA, THREAD VEINS, SPIDER VEINS AND SCARS

Test patches start at £80 and full treatment prices start from £80

BROWN SKIN BLEMISHES

We have a choice of Q-switch lasers designed to break up brown pigment in the skin. A choice of ablative lasers designed to remove superficial lesions from the surface of the skin are also available. Our laser-trained plastic surgeons carry out this treatment. Our most popular treatments include:

AGE OR SUN SPOTS, LENTIGO, BROWN BIRTHMARKS.

Test patches start at £80 and full treatment prices then start from £100

LASER HAIR REDUCTION

We have both Alexandrite and Nd:YAG lasers with air cooling to ensure that we can safely treat any skin type. Our specialist laser nurses carry out this treatment for aesthetic purposes or for the following conditions:

FOLLICULITIS, PILONIDAL SINUS, HIRSUTISM (E.G. CAUSED BY POLYCYSTIC OVARIAN SYNDROME)

Test patches are £50 and full treatment prices start from £50. Patients with a confirmed

diagnosis of polycystic ovary syndrome are entitled to a 20% discount on all hair removal treatments.

TATTOO REMOVAL

We have several Q-switched lasers to help ensure that we can remove a wide range of coloured tattoo inks. We also offer tattoo reduction for those wishing to remodel their tattoos. Our trained laser nurses and clinical scientists carry out this service.

Test patches are £50 and full treatment prices start from £50.

SKIN RESURFACING AND FRACTIONAL REJUVENATION

We are able to offer both fractional and full ablative treatments using either the Er:YAG or CO₂ lasers. Our laser-trained plastic surgeons carry out this treatment. Our most popular treatments include:

SCARS, FINE LINES AND WRINKLES, SUPERFICIAL LESIONS, DYSCHROMIA

Test patches start at £80 and full treatment prices then start from £100

BOTOX

Cosmetic line reducing injections are also available. Line reducing injections are delivered by a Consultant Plastic Surgeon. Prices for Botox® injections start at £200.
