01/04/2018 to 31/03/2019

01/04/2020 to 31/03/2021

Q1. Skin grafts - for periods April 2020- March 2021 and April 2018- March 2019

Does Salisbury Hospital carry out skin graft surgeries?

Yes

If yes, how many procedures are carried out (monthly / annually) and the reason for the skin graft?

--Note not possible to provide reason for skin graft

2018-19 Financial Year				2020-21 Financial Year			
Procedure Year	Procedure Month	Financial Year	Number of Skin Graft Procedures	Procedure Year	Procedure Month	Financial Year	Number of Skin Graft Procedures

01/04/2020 to 31/03/2021

Q2. Wounds and Dressings: for periods April 2020- March 2021 and April 2018- March 2019

How many chronic wounds does Salisbury Hospital treat? (monthly / annually)

What is the main cause of these wounds? Eg. venous ulcers, pressure ulcers, diabetes, burns etc.

Split by Episode (Wound) Type:

Explanation 1:

Note that Patients or Admissions that had episodes of care start in multiple months will be included more than once. These episodes of care could be for the same or different wound types In addition the same episode of care could be coded with different wound types and will therefore be included more than once.

Where the number of patients/spells/episodes is <= 5 this has been redacted for IG purposes.

Explanation 2:

To note that episodes may be duplicated where multiple episode/wound types are coded within the same episode of care.

The same patient may have multiple episodes of care counted over different months if more than one episode was coded to the same or different wound types.

Where the number of patients/spells/episodes is <= 5 this has been redacted for IG purposes.

Year	Month	Financial Year	Number of Unique Patients Split by Wound/Episode Type			Number of Unique Spells Split by Wound/Episode Type			Number of Unique Episodes Split by Wound/Episode Type		
			Burns/Corrosions Total	Pressure Ulcer	Venous Ulcer	Burns/Corrosions Total	Pressure Ulcer	Venous Ulcer	Burns/Corrosions Total	Pressure Ulcer	Venous Ulcer

2021	2	2020-21	21	35	<= 5	21	35	6	28	54	8
2021	3	2020-21	21	29	<= 5	21	29	<= 5	25	42	8

Proportion of Each Wound Type Coded With Diabetes

For IG purposes we are not providing the number of patients coded with Diabetes by month, the table below gives the percentage of episodes of care that were coded to Diabetes in addition to a wound type.

Financial Year	Burns/Corrosions Total	Pressure Ulcer	Venous Ulcer
2018-19	4.9%	27.1%	22.6%
2020-21	8.9%	29.3%	17.9%
Combined	6.9%	28.2%	20.1%
