

# Henry goes to Nuclear Medicine

Radiology is on Level 3

Henry goes to Sarum Ward first to have a needle in his paw.

Henry is waiting with his grown up in the Sarum ward waiting area.

The nurse puts magic cream on Henry's paw. He is now having his small needle.

Henry is being brave.

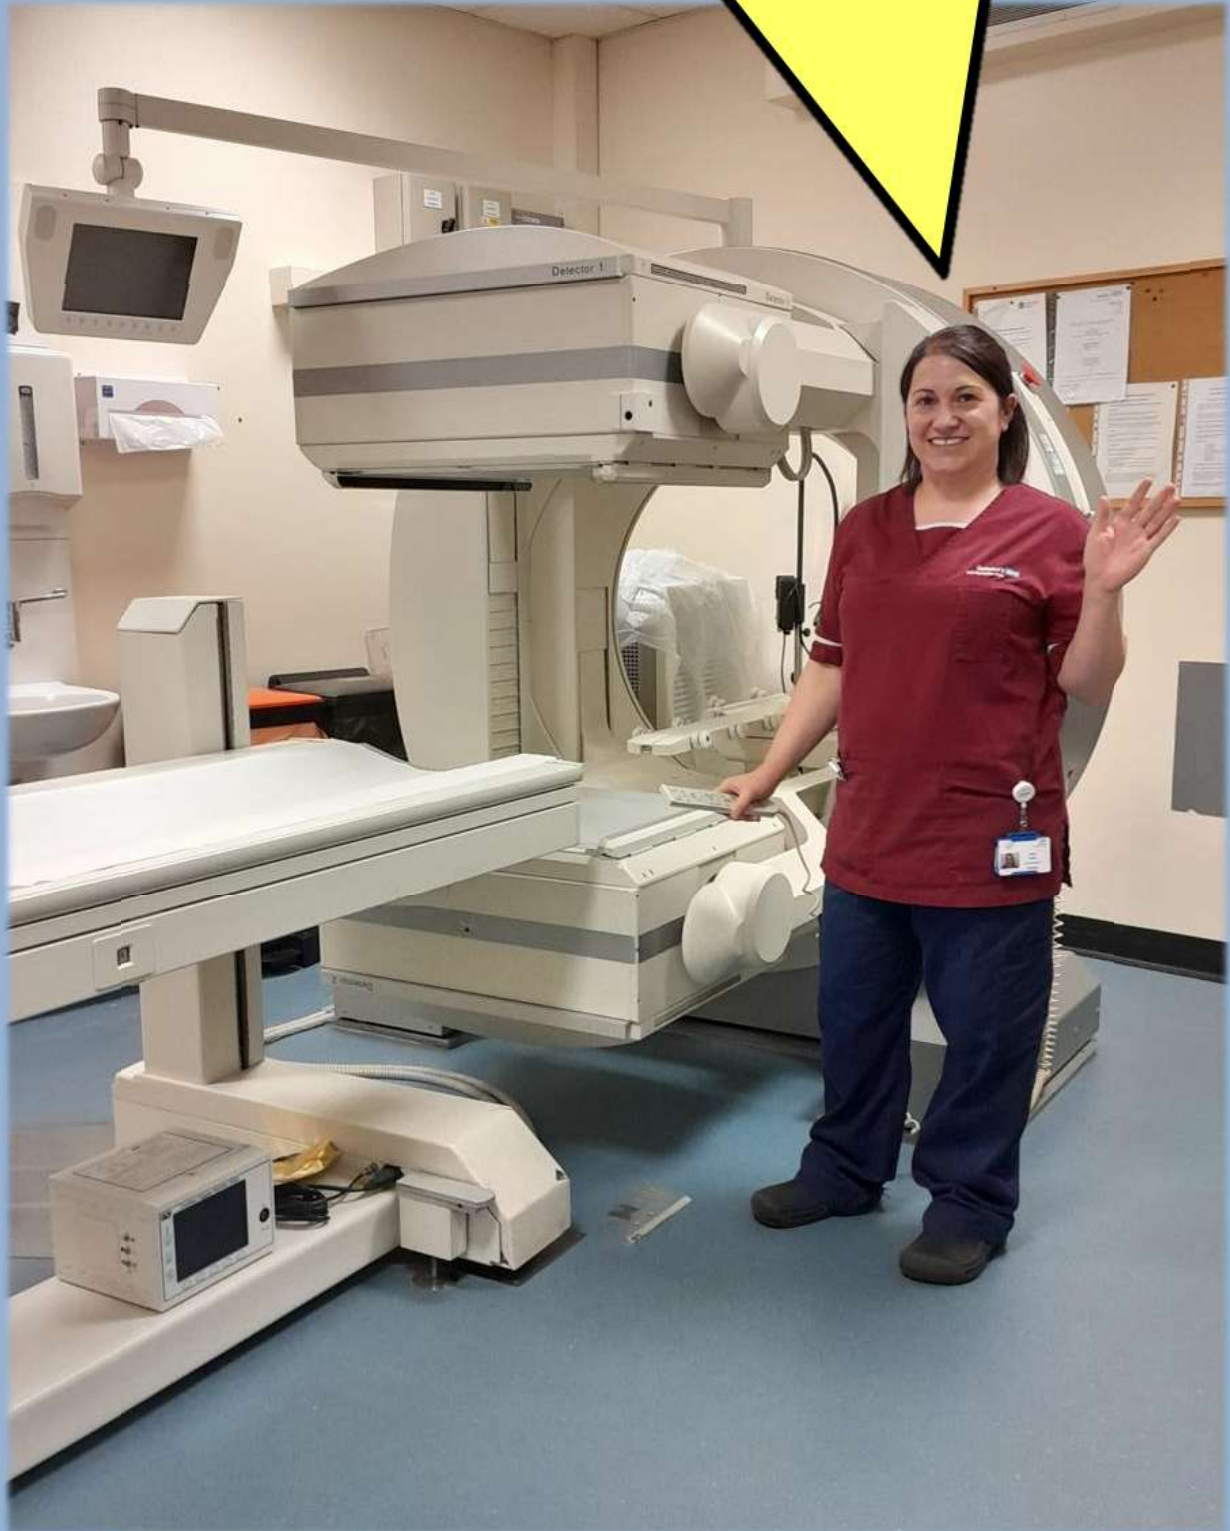

Henry books in at  
Radiology reception.

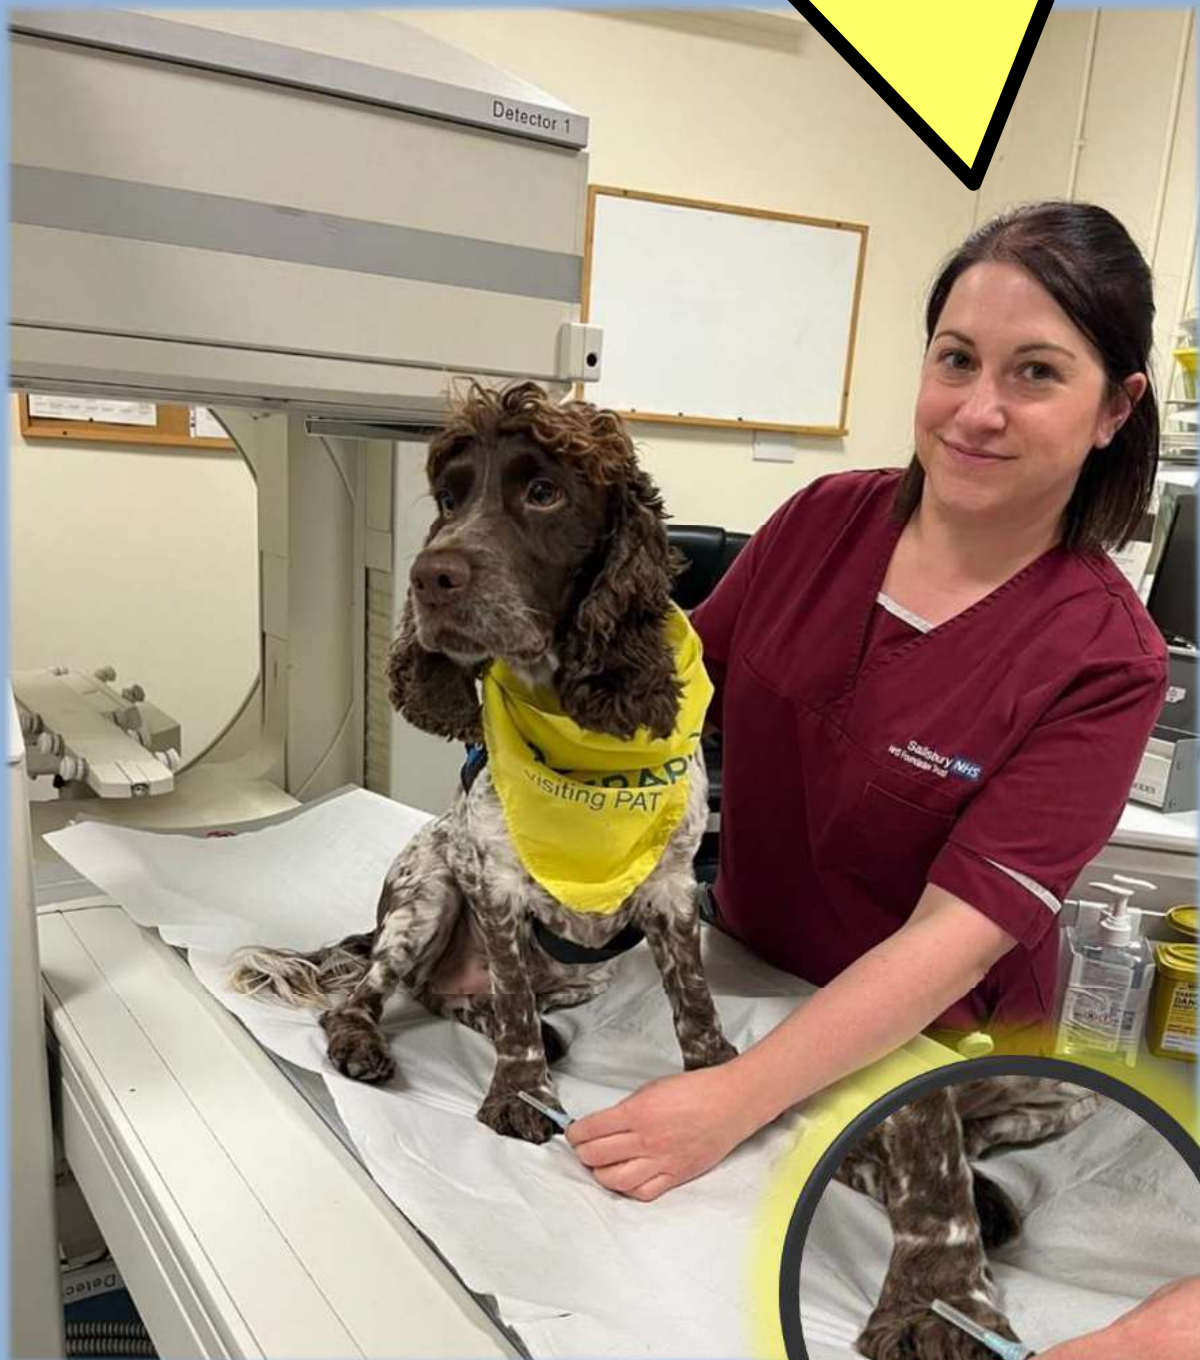

Henry sits in the waiting area and waits his turn.

Hello, my name is Lesley.  
I am a Radiographer.

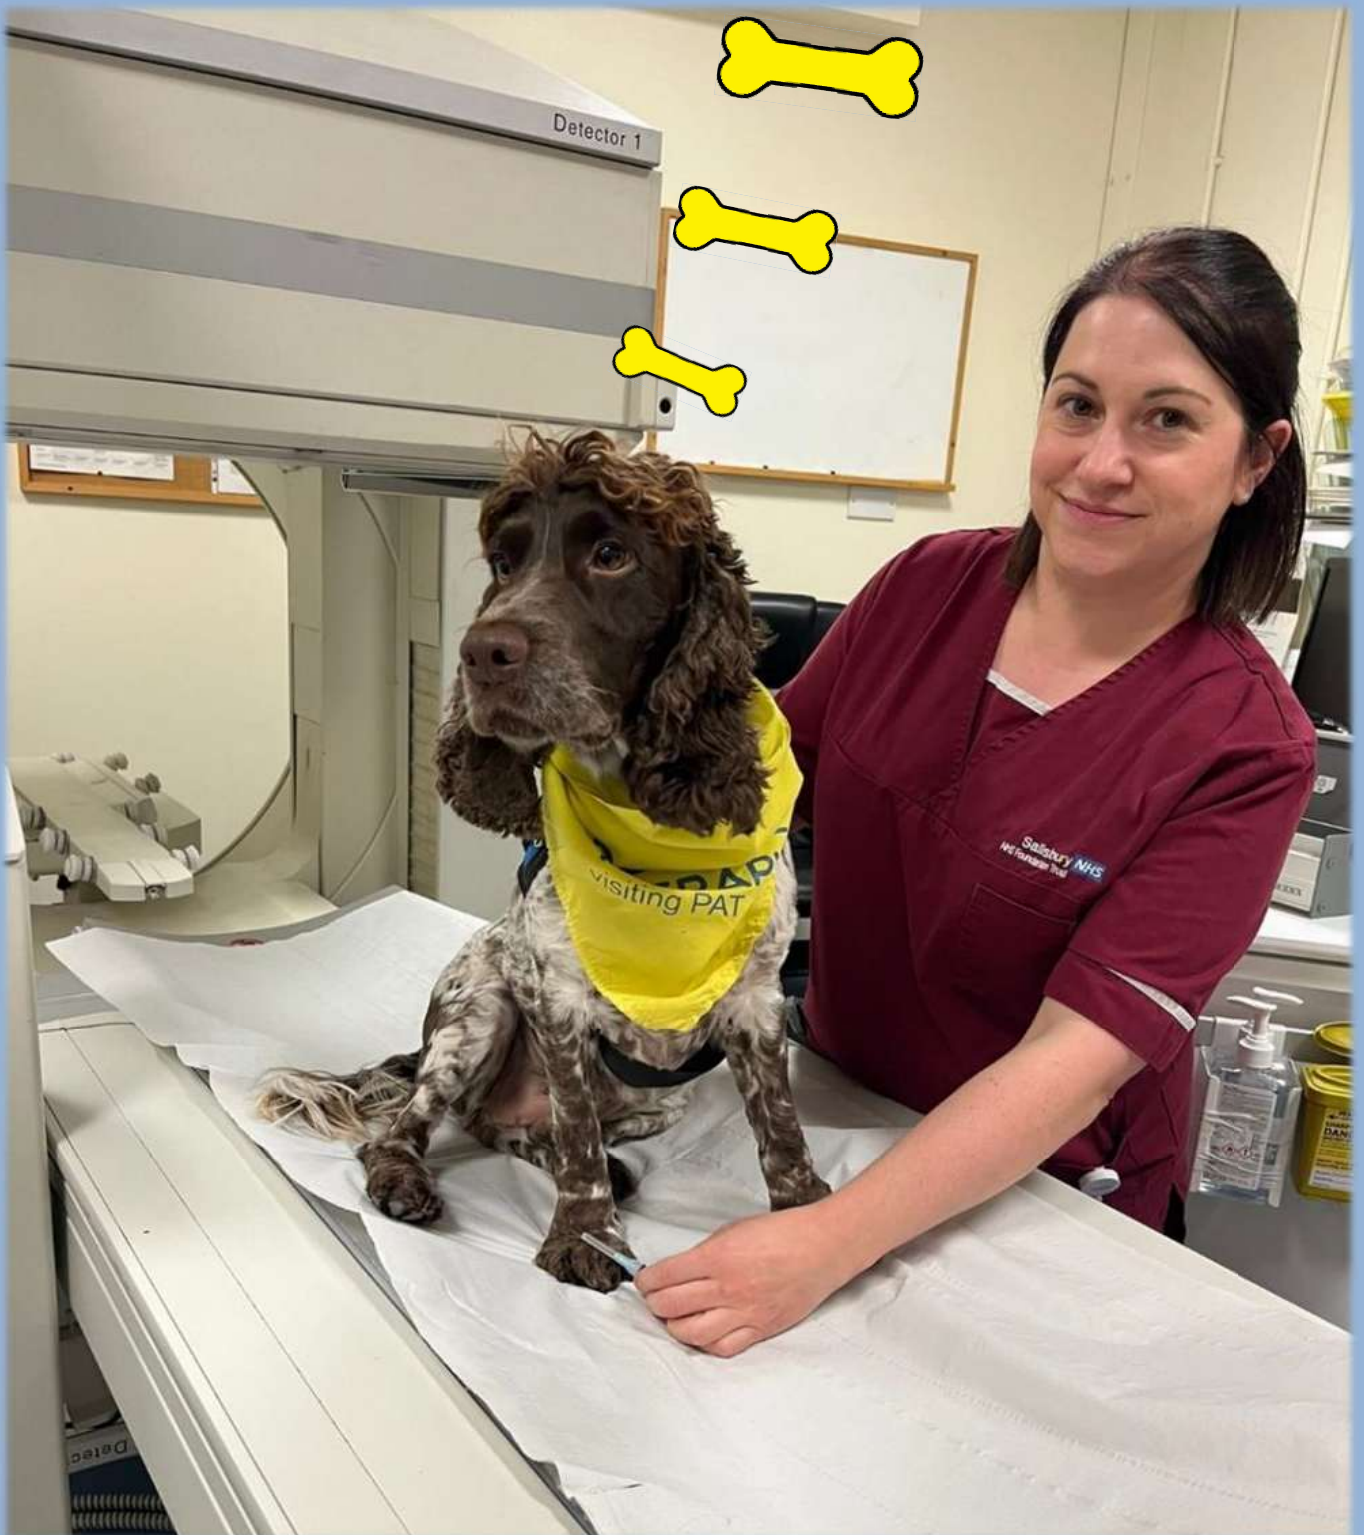

This is the nuclear medicine room.

I will use the needle from Sarum Ward to put some special medicine in your body.

That injection was small,  
and I feel okay.

If you're having a DMSA scan, you will have to wait at least 2 hours.

If you're having a Mag-3 scan, we will start straight away.

Henry lies down on the bed,  
ready for his scan to start.

Your grown up can stay  
with you if they need to.

Well done Henry, the scan is now finished.

Henry was brave  
and deserves a sticker.

That wasn't scary and  
it didn't hurt.
